

We love the relaxed and cool blue tones used throughout the kitchen.

ISLAND STYLE

"From the effective use of space to the innovative island bench, this kitchen design is simple and elegant. The client's brief was to transform what was once a typical closed kitchen into an open, inviting space, where at least two people could dine comfortably. Further client considerations included fully ducted air conditioning, integrated lighting solutions and a splash of colour. This brief has been produced with flair and smart design elements. The project is open plan, comfortably allowing for cooking, dining and entertaining. A sliding door to the outdoor area has been included, maintaining a relationship between the indoor and outdoor spaces. The layout of the kitchen also creates plenty of space for multiple people cooking and washing, with the cooktop isolated from the sink. With the use of gloss, touch-to-open cabinetry, the overall design is seamless and clean. An oceanic blue motif runs throughout the room and completes the look."
